THE GAP

Great series, no English channel

Many Korean and Chinese studios publish strong series at home, but have no simple way to reach readers in English.

Translation is work

Natural English that keeps names, terms and each character's voice consistent takes a dedicated team.

Lettering and release

Typesetting, proofreading against the original pages and a steady episode schedule all need hands.

Finding readers

A new series needs placement, social posts and trailers to be found by English-speaking readers.

WHO WE ARE

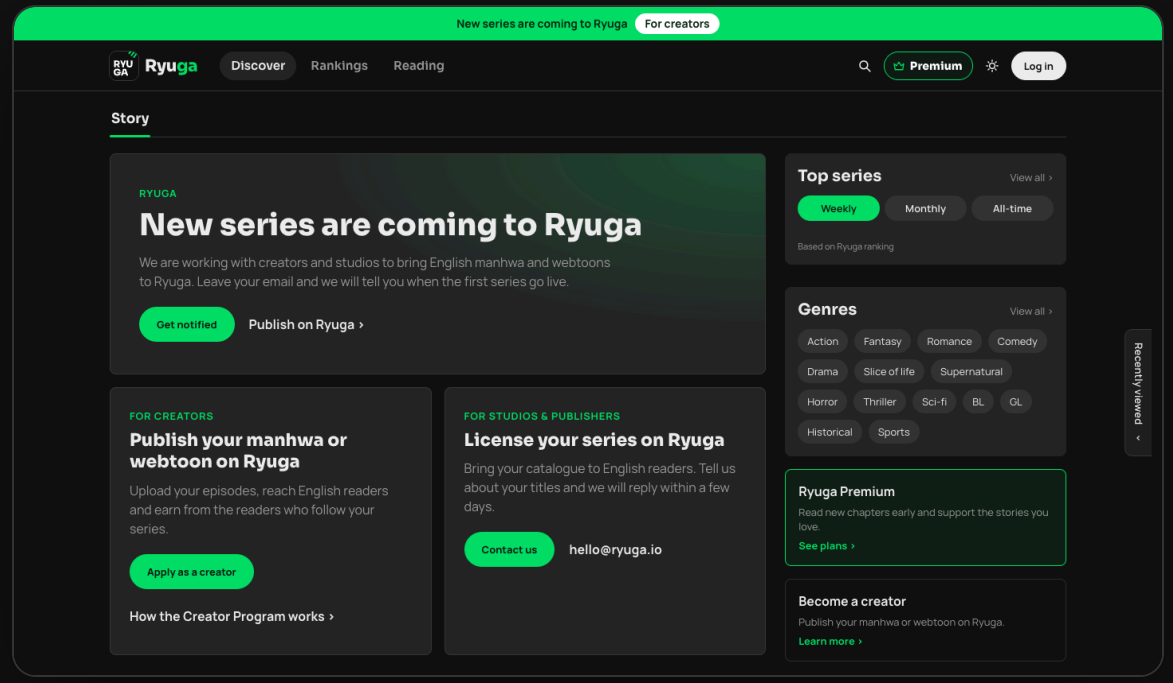

Ryuga, an English-language publisher

Ryuga is a subscription reading platform for manhwa and manhua at **ryuga.io**.

Readers browse by genre, follow series episode by episode, and unlock every chapter with one plan, Ryuga Premium.

We license the English edition of finished and ongoing series from studios, publishers and independent creators.

Operated by Quang Hieu Global Company Limited.
